The Battlegrounds of Bio-Science

By Frank Miele

AuthorHouse. Paperback. Condition: New. 336 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. The start of the new millennium has seen the dawn of Charles Darwins dream - the synthesis of the physical, biological, and social sciences, what E. O. Wilson (who author Tom Wolfe dubbed Darwin II) has called consilience. But to a vast portion of the American population, especially the Religious Right, not only Christian, but Muslim as well, human evolution itself is a dangerous heresy. They fear that emerging neo-Darwinian disciples such as Sociobiology and Evolutionary Psychology are heading us to a world where there are no absolutes and anything goes. Many on the Far Left, including radical deconstructionists, militant feminists, and unrepentant Marxists, the explosion of knowledge on the genetic basis of disease and behavior as leading to a newer, seemingly more acceptable Social Darwinism. They fear the rise of a dangerous form of corporate-controlled biotechnology and eugenics where the strong do as they will and the weak suffer what they must. What all these very strange bedfellows share is that they are all subscribe to the dogma that a certain collection of written words (whether attributed to God, Allah, one man, or womyn, must take priority...
