RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 106 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . while in general the least upward extension is observed in the Apennines and in the Balkan Peninsula. -V. M. Spalding. The Peat Deposits of Florida. ---Harper has published a report; of his reconnaissance of the peat deposits and peatforming areas of Florida. In addition to a considerable mass of information relative to peat, the report contains the best description of the vegetation of Florida which has yet been made. Fourteen natural divisions of the state are outlined by maps and briefly characterised as respects their topography, soils and vegetation. The low elevation and immature topography of Florida give rise to a bewildering variety of palustrine areas, which have naturally received more attention in this paper than the upland vegetation. Harper has described some 27 types of marshes, swamps, bogs, prairies, bays and other formations with wet substratum. He has used the character of the vegetation in distinguishing these areas and has followed the refreshing custom of giving them either such names as are locally used for them or else simple designations that are descriptive of their vegetation or their most obvious physical characters. The alluvial and estuarine swamps and marshes appear to be clearly differentiated from those in which the water is calcareous, the latter group embracing the great majority of the areas described. Also of importance Harper, Roland M., Preliminary Report on the Peat Deposits of Florida Third Ann. Rep Fla. State...
