CYR61: ANGIOGENIC MARKER IN FRACTURE HEALING AND ITS CLINICAL IMPLICATIONS (PAPERBACK)

Iconcept Press, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. The fracture healing is a postnatal regenerative process that recapitulates many events of embryonic skeletal development. Although fracture repair usually have the potential to regain its pre-injury cellular composition, structure and biomechanical function, about 10 of fractures will not heal normally. Long bone fractures are the most common traumatic injuries to the human beings, in which tibial bones are the most common one. Presently there is no standard criteria exist for diagnosing fracture impaired union early. Till date clinico-radiological examination are most commonly used for assessment of fracture healing progression. But due to lack of objectivity the assessment of fracture healing varies among orthopaedic surgeons. This variability can be problematic in both clinical and orthopaedic trauma research settings. Also inability to predict impaired healing early also charges extra cost, morbidity, long time hospitalization to the patients. An understanding of risk factors for impaired healing and of diagnostic tests used to assess fracture healing outcomes early can facilitate a systematic approach to provide a better assessment and management of fractures. Therefore to overcome the current limitations of clinico-radiological assesment of fracture healing, over the past few decades, scientists and clinicians have been trying to exploring the use of different biomarkers that may reflect the bone turnover process and might be used as a marker to predict the healing impairment early. Angiogenesis plays a crucial role during intramembranous bone formation and endochondral ossification. Cysteine Rich Angiogenic Inducer 61 (CYR61) is one of the marker which was express during angiogenesis as well as bone remodeling process. CYR61: Angiogenic Marker in Fracture Healing and its Clinical Implications provides current information regarding the biology of fracture repair, reviews the importance of angiogenesis during fracture repair and explores one...
