MATHEMATICAL METHODS FOR CURVES AND SURFACES

Springer. Paperback. Book Condition: New. Paperback. 446 pages. Dimensions: 9.2in. x 6.2in. x 1.1in. The Seventh International Conference on Mathematical Methods for Curves and Surfaces took place June 26-July 1, 2008, in Trondheim, Norway. The earlier conferences in the series took place in Oslo (1988), Biri (1991), Ulvik (1994), Lillehammer (1997), Oslo (2000), and Tromsø (2004). The conference gathered 165 participants from almost 30 countries who presented a total of 129 talks. This includes nine invited talks and seven mini-symposia.

This book contains 28 original articles based on talks presented at the conference. The topics range from mathematical analysis of various methods to practical implementation of modeling graphics processing units.

The papers reflect the new developments in the field and also point to the latest literature. The authors and reviewers for the hard work and helpful collaboration and we thank both

the authors and the reviewers for their hard work and helpful collaboration. We wish to thank those who have supported and helped organize the conference.

First and foremost it is a pleasure to acknowledge the generous financial support from the Department of Informatics and the Centre of Mathematics for Applications (CMA) at the University of Oslo, and the Research Council of Norway. We would also like to thank Andrew McMurtry for his help with technical matters, and Sara Mørken for her help with the registration. November 2009 The Editors Organization Organizing Committee...

Reviews

This written ebook is great. I was able to comprehend every little thing using this written publication. I am very happy to tell you that this is the finest ebook I have gone through during my individual existence and could be the greatest ebook for possibly.

-- **Simone Goyette II**

This ebook will not be effortless to get going on studying but very enjoyable to learn. Of course, it can be play, still an amazing and interesting literature. Your daily life period will probably be enhanced once you complete looking at this book.
