GERIATRIC BIOSCIENCE: THE LINK BETWEEN AGING AND DISEASE (HARDBACK)

JOHNS HOPKINS UNIVERSITY PRESS, United States, 2007. Hardback. Condition: New. Language: English . Brand New Book. It is increasingly important for physicians who treat older persons, and for researchers on aging, to understand how molecular biology informs clinical expressions of aging and age-related conditions such as osteoporosis, diabetes, osteoarthritis, frailty, cancer, and dementia. Dr. David Hamerman translates basic scientific concepts into precepts of clinical practice and sheds light on the links among biology, natural aging, longevity, and disease. Exploring the connections between disease and the science behind it, Geriatric Bioscience addresses how mechanisms of inflammation, cytokine expression, and stress responses influence disease and how preventive gerontology in the practice of medicine could compress morbidity. Hamerman also discusses cutting-edge therapies such as cyclo-oxygenases, bisphosphonates, statins, cytokine inhibitors, and hormone therapies. Examining the science of geriatrics and converting its concepts into clinical applications, this groundbreaking work provides clinicians and researchers with a solid foundation for a greater understanding of the diagnosis, treatment, and prevention of age-related diseases as well as recommendations for promoting healthy aging.
