The University of Michigan Press, United States, 2004. Paperback. Condition: New. New. Language: English . Brand New Book. The first classroom book for undergraduate courses in public choice analysis, covering both political economy and social choice issues Public choice analysis applies the methodology of economics to issues in political science and the policy process. The readings in this anthology cover topics in both institutional political economy and social choice theory and are comprehensible to nonspecialists and advanced undergraduates with a background in basic economic theory. Readings are taken from academic journals and book chapters and are reproduced in their entirety. They are selected to ensure they contain a minimal amount of notation and are free of advanced econometrics. The anthology contains two to three readings each to explore the areas of rent seeking, collective action, bureaucracy, elections and the economy, choosing decision rules, majority rule, alternative voting procedures, and the calculus of voting. Each part contains a brief introduction to the general theme, and questions are presented as a guide to each reading. Additional suggested readings are provided to develop these concepts further. Jac C. Heckelman is Associate Professor of Economics, Wake Forest University.
