Excerpt from *John Thelwall: A Pioneer of Democracy and Social Reform in England During the French Revolution* Within the period extending from the American War to the present day, great changes have taken place in English political theory and practice. For a statesman of 1775, were he even a Whig, the notion of government was inseparable from oligarchic rule, was limited to matters strictly political, and dominated by considerations of expediency. A statesman of 1905, even if he is a Tory, accepts, or at any rate recognises, government by the people, and asserts the need not only of political but of economic and moral melioration; if he is a Liberal, along with the traditional empiricism of England, he sets down a rational ideal as a potent factor in the work of civilisation. Democracy, social reform, political idealism - such are the chief features which distinguish the politics of our time from those of the end of the eighteenth century.
