Australian Fishing Network, Australia, 2017. Paperback. Condition: New. Language: English . Brand New Book. In this book you will receive information on bass. For example, there are a number of Black Bass species in North America that includes smallmouth, spotted, red-eye, Suwannee, shoal and Guadalupe. Perhaps the best known and most revered is *Micropterus salmoides*, or Largemouth Bass. The best way to catch more fish is to understand them as much as possible -- you may have heard that said often. It is true. You need to understand where they live, what they feed on and where and when they spawn. There are also a couple of questions you will want to ask yourself: Why and how do I catch them? The simple, or should we say complex answers will help you locate fish. In this book you will be shown the best rigs to use, how to rig them, plus where, how and when to fish them. The book is aimed directly at short-cutting that learning curve. It offers you the knowledge on where to target bass, what to use, and how to fish so you can tangle with lunkers too!.
