Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: . Brand New Book ***** Print on Demand *****.The basic theme of this booklet is to provide a simpler description of how the consciousness of the quantum field shapes the reality of each moment and in everything, and how that consciousness is not different from our deepest awareness of oneself. Its purpose is to provide an insight into the nature of reality in a simple way. We start our story from an abstract description of the discovery of quantum physics and end it by recognizing these insights in everyday life around us. The whole story can also serve as an addition to my previous book, Sankhya - Ancient Science of Nature and the Human Soul, because in describing the basic settings of theoretical physics I will use the ancient scheme of nature categories from the science of Sankhya, and I will do this because Sankhya discovers gestalt, the background or context of almost all the fundamental scientific discoveries of the modern age, and also experimental physics, it gives a map of the whole existence. It is also the reason why Sankhya connects the basic physical laws with the consciousness of man, she reveals that the essence of man (purusha) is in fact the outcome and essence of the whole nature (prakrti). These two essences are related to human self-awareness and action. Therefore, the main goal of this story is to connect the essence of natural laws with the essence of man in the simplest way. I consider that all the misconceptions of human and all problems in this world are based solely on the delusion that these two essences are different. They are one essence: our essence.
