## SHORT TERM OUTCOME OF PATIENTS WITH LOW EJECTION FRACTION IN OPCABG

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Ischemic heart disease is common cardiac disease in South East Asia specially in Bangladesh. More and more people are getting affected with this disease due to change in life style and dietary habit. For this number of patients with multivessel coronary artery block is increasing. And coronary artery bypass grafting plays important role to treat these patients. Coronary artery bypass grafting in patients with low ejection fraction (EF 35%) is very challenging...
