## BIODEGRADATION OF AROMATIC (PHENOL) COMPOUNDS

Veluru Sridevi  
M.V.V. Chandana Lakshmi  
**Biodegradation of Aromatic  
(phenol) Compounds**  
Optimization of physico-chemical parameters

LAP Lambert Academic Publishing Mai 2012, 2012. Taschenbuch. Condition: Neu. Neuware - The environment, as a consequence of industrial and agricultural revolutions, tends to harden with potentially carcinogenic and mutagenic halogen-substituted aromatic compounds. Phenol and its higher molecular homologues are dangerous environmental pollutants. Due to their toxic character, these molecules tend to accumulate in water and soil after being discharged without an adequate treatment. Phenol concentration greater than 50 ppb are toxic to some form of aquatic life and indigestion..

### Reviews

*Comprehensive information! Its this sort of excellent read. I could possibly comprehended every little thing out of this published e pdf. You wont sense monotonny at at any moment of your time (that's what catalogs are for about when you ask me).*

-- **Prof. Mauricio Howe III**

*This written book is great. I am quite late in start reading this one, but better then never. You will not really feel monotonny at at any moment of your time (that's what catalogs are for about when you check with me).*
