

The Race for Technology: Conquering The High Frontier

By Thomas W. Becker

AUTHORHOUSE, United States, 2008. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.This third book in the Technology Trilogy describes the development of several emerging technologies from 1970 to the start of the 3rd millennium written to explain the human side of science and technology. Against a background of world space exploration, the Cold War, U.S. defense systems, European Space Agency imaging of Halley's Comet, search for the Soviet nuclear explosion at Chernobyl, Russia's crash space programs, and the runaway 1995 Hurricane Season, these three decades kept our nation alerted to communist aggressions. Once again you are there through the author's eyewitness experiences in one adventure after another - from the continued assault on Mars to an in-flight refueling of a B52 bomber and the technology education of gifted young people. While each chapter stands on its own merit, each presents a separate view of the entire picture of the last quarter of the 20th century. If you remember the 20th century, or if you want to gain a glimpse of world events at the end of the century, you will want to read this exciting book.

Reviews

The book is fantastic and great. It generally does not expense excessive. Its been designed in an exceptionally easy way and it is simply right after i finished reading through this book by which really changed me, change the way i think.

-- Adolfo Lindgren

Very good eBook and valuable one. This is for anyone who statte that there was not a worth reading. You will not truly feel monotony at at any time of your own time (that's what catalogs are for concerning if you question me).

-- Ms. Ona Muller
