Lucky for them, this book will be there to greet them! Written by design and prepress pro Jeff Gamet, this book focuses on the Mac OS X Tiger features that designers want and need to know to work efficiently and effectively with the operating system. Instead of pages and pages devoted to iChat, e-mail, and browsing the Net, readers will find chapters devoted to fonts, printing, creating and working with PDFs, managing color, networking, shifting between Classic and Mac OS X, Mac OS X's built-in design and productivity tools, system maintenance, security, and more. Throughout, Jeff explains not only how to do things in Mac OS X Tiger but why the OS works the way it does so that designers can improve their workflows by avoiding common problems. 280 pp. Englisch.
