Often, however, the decision-makers lack the knowledge and skill to process the existing documents and retrieve information that is useful for their decision-making. The objective of this tutorial is to improve basic skills on how to process existing data by providing a collection of simplified, but realistic, hands-on-examples. In essence, this tutorial is a collection of business mini cases. It starts with relatively simple cases and then progresses step-by-step by adding complexity to each of the following business cases. Its intent is to encourage effective and efficient use of application software to help the decisions-makers. There are three major changes to the second edition. First, several additional mini case studies are added. Second, the case studies are rearranged to allow a more systematic progress. Third, in addition to a solution key, detailed solutions to 35 exercises by using Ms Excel are added. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
