## On the Genus Arenaria, Linn (Classic Reprint) (Paperback)

By Frederic Newton Williams

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from On the Genus Arenaria, Linn Linnaeus enumerated 25 species, of which 11 occur in the first edition of Species Plantarum. As Godron long ago pointed out, if *Lychnis* is to be considered as a genus distinct from *Silene*, then *Alsine* should be considered as distinct from *Arenaria*; as in each case a primary differential character is the number of the teeth of the capsule in relation with the number of the styles. The presence of a strophiole at the hilum of the seed is a constant character, and important enough to exclude a number of species included by some authors in *Muhlenbergia*; though this differential character is not mentioned in the Linnean diagnosis of the genus. Most of the other proposed genera frequently included under *Arenaria*, in its comprehensive sense, are best considered as primary subdivisions of *Alsine*. The genus *Arenaria*, in this paper, is defined more in accordance with Fenzl's circumscription of the admitted species, and as propounded by him in Endlicher's *Genera Plantarum*.
