C. : Congress of the United States, Office of Technology Assessment : For sale by the Supt. of Docs. , U. S. G. P. O. , 1981. LC Number: RC268 . A84 OCLC Number: (OCoLC)07587547 Subject: Cancer -- Prevention -- Technological innovations. Excerpt: . . . 9 Ch. I - Summarya Table 2. - Summary of Cancer-Associated Environmental Factors - Continued Range of estimates b associated with factor Factor Sites considered in drawing the estimates Less than 7-3 percent Natural radiation Skin, breast, thyroid, lung, bone, blood ( leukemia ) There is no doubt that natural radiation, consisting of ionizing radiation from cosmic rays and radioactive materials, can cause cancer. While disagreements persist regarding the amount of risk associated with low-level ionizing radiation, the estimates generally agree within one order of magnitude. Ultraviolet radiation from the Sun is believed responsible for most of the 400, 000 nonmelanoma skin cancers. These tumors are not usually included in quantitative estimates of cancer rates because they are poorly recorded and generally curable. They are not included here. Less than 1-2 percent Possibly all sites Consumer...

### Reviews

*The very best book i actually read through. I have got read through and i am certain that i will likely to read through yet again yet again down the road. I realized this ebook from my dad and i suggested this book to learn.*

-- **Alfreda Barrows**

*This is basically the finest publication i actually have go through till now. We have read and i also am confident that i am going to likely to read through again once more in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Prof. Adell Lubowitz**
