Thoughts On Publishing, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Thoughts On Creation is a synthesis of the author s understanding of science and religion trying to make sense of creation and our place in it. Throughout the work there is a basic theme of relating man s activities and responsibilities in day-to-day life, to the impact his choices make regarding his existence in creation. The author builds on early discussions of the origins of creation and organization of the infinite to provide a context where man is thought into existence in the mind of Creator. An overview of man as a child-of-creation is given so the reader can easily understand how we fit into the big picture of creation. Man s journey as a Divine Essence leaving the mind of Creator and appearing on the physical plane to learn, experience and evolve is clearly described. Simple explanations are given for how man develops his skills as a creator to manifest things and ultimately control his own destiny. The role of free will, discipline and responsible living are given close examination as they relate to daily life and the larger scheme of developing man as creator. Compelling evidence is given regarding relationships and sex as people experience them explaining why we chose to pursue that special someone to be with. Insights involving how we relate to each other on an interpersonal level are discussed, including the use of awareness and perception of energy levels in others. The role of the subconscious is discussed giving the reader an understanding of this vital piece of the human package. An explanation for and the importance of the complete vibratory record of our existence while on the physical plane is explored, including how this unique vibratory...
