

The Cosmic Theory of Thermodynamics The Creation and The Secrets of Our Universe, The Ultimate Being of Our Existence

Filesize: 8.32 MB

Reviews

*A must buy book if you need to adding benefit. It is actually writter in basic phrases and never difficult to understand. I found out this book from my dad and i advised this publication to find out.

Trafford Publishing. Paperback. Book Condition: New. Paperback. 164 pages. Dimensions: 10.0in. x 6.9in. x 0.4in. As author of this book, I believe I have discovered a New Theory of Physics, which is beyond standard model. It explains clearly with proof what is the substance of electrons, positrons, and neutrinos, which are the building blocks of nature. The theory explains how they were created, what their shape is, what they are consisted of, and how they are connected to build the heavier particles including the quarks, which finally made the protons and the neutrons that make up the entire universe. The composition of our entire universe whose foundation consists of the building blocks of nature, heavier particles, quarks, protons, and neutrons make the microcosmic and macrocosmic planetary system of atoms, stars, and galaxies, etc. Also explained are, why negatively charged electrons don't repel each other inside the atoms. Using the laws of mathematics I found the electric charge of an electron, and I got precisely the rest mass energy in electro-volts of all kind of basic leptons. I started writing my theory thinking that a materialized universe could never exist. There could only exist a temperature founded in a double basis of a different amount of cold and hot. In this case motion would be created to move the universe and produce forces, planetary systems, and different powers of cold-dynamics and thermodynamics to hunt one another. Mass is energy and it must be consisted of condensed hot and cold temperature. Therefore temperature is the key word of my theory. Since my years of childhood I have done a lot with my life. I was born in Piraeus, Greece at a time when World War I just finished. Those were some difficult times and they cannot be forgotten. My motto was always to...
