VERBAL REACTIONS - WORD SCRAMBLES WITH A CHEMICAL FLAVOR (EASY): REARRANGE SYMBOLS FROM CHEMISTRY S PERIODIC TABLE TO UNSCRAMBLE THE WORDS

Createspace, United States, 2011. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.VERBAL ReAcTiONS are a new form of word scrambles with a chemical flavor. You don t need to know any science to be able to solve VERBAL ReAcTiONS puzzles, but the puzzles bear a resemblance to chemical reactions.EXAMPLE: Here is a sample: Es + 2 S + P + Si + 2 O + N .This VERBAL ReAcTiON is a word scramble consisting of one Es, two S s, one P, one Si, two O s, and one N. That is, the word scramble contains the elements Es, S, S, P, Si, O, O, and N. Unscramble these elements to form an 8-symbol word (that s why there are 8 blanks in the puzzle).ANSWER: For this puzzle, the answer is P O S S Es Si O N (possession).These VERBAL ReAcTiONS resemble chemical reactions in two ways. First, the scrambled elements appear added together on the left of the reaction with coefficients (like the number 2 in the puzzle above) telling you how many of each element the solution contains, and you fill in the result of the VERBAL ReAcTiON by rearranging the elements and writing them on the blanks on the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSESiON is made using the symbols for phosphorus (P), oxygen (O), sulfur (S), Einsteinium (Es), silicon (Si), and nitrogen (N). You don t need to be familiar with the periodic table to solve these problems; nor do you need to know any chemistry. You just need to be able to count and...
