BIOCULTURAL LANDSCAPES

Springer-Verlag Gmbh Sep 2014, 2014. Buch. Book Condition: Neu. 244x161x17 mm. Neuware - This book is devoted to the cultural and biological dimensions and values of landscapes, linking the concepts of biodiversity, landscape and culture and presenting an essential approach for landscape analysis, interpretation and sustainable dynamics. Early chapters explore the concepts and values of biocultural landscapes, before addressing the methodology to identify the relationship between biological and cultural diversity. The volume continues with a series of case studies and with an exploration of the key role of biocultural diversity in contemporary landscape ecology. Readers will learn the importance of landscapes for different fields of natural and human sciences and are confronted to the trans-disciplinary nature of the landscape concept itself. A hierarchical approach to landscapes, in which they are composed of interacting (eco)systems, is shown to be essential in recognizing their emergent properties. In this work, the biocultural values of landscapes are explored through their diversity in geographical scopes, methodological approaches and conceptual assumptions. Authors from Asia, Europe and North-America present diverse research experiences and views on biocultural landscapes, their pattern, conservation and management. Landscape ecologists will find this work particularly appealing, as well as anyone with an interest in sustainable landscape development, nature conservation or cultural heritage management. This volume is the outcome of a symposium on 'Biodiversity in Cultural Landscapes', organized in the framework of the 8th IALE World Congress, held in Beijing in 2011. 218 pp. Englisch.
