Createspace, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Charles S. Newhall adds to his series of books on the plants of Northeastern America a very attractive volume on the Vines. This book is printed and bound with the characteristic clearness and good taste of the publishers, Messrs. G. P. Putnam s Sons, and will make a very useful addition to the library of every country or seaside house. From beginning to end the book is relieved of the heaviness and dullness of a scientific treatise by well-chosen quotations, verse and prose, and the absence of technical terms makes it available to every one whose eyes are open and whose interest in out-of-doors is such as to make a knowledge of the habits as well as of the names of plants desirable. By means of the three keys, or Guides, based on the characters of leaves, flowers, and fruits, respectively, one can determine the name of any vine during any of the three seasons of the year when out-of-door objects are most likely to attract one s notice. The list of families and genera among which vines- Frail things, fair things, that creep and climb- are found furnishes an interesting basis for comparison: for instance, in the Crowfoot Family there is but one genus of plants which need support, namely, the favorite Clematis; in the Pea Family there are nine genera, in the Rose Family four, in the Lily Family but one, in the Fern Family one, in the Club-Moss Family one. Thus the list includes flowerless as well as flowering plants. But for any satisfactory comparison one must turn to the species rather than to families and genera, for there may be erect plants as well as vines in a genus. Such...
