POTENTIAL OF BIOGAS PRODUCTION FROM BIOMASS AND ORGANIC WASTE MATERIAL

LAP Lambert Academic Publishing Apr 2018, 2018. Taschenbuch. Condition: Neu. Neuware - This book reviews different ways of energy generation from different resources like agricultural waste, municipal solid waste, and municipal sewage sludge, by producing biogas through anaerobic digestion system and converting it to heat or electricity, or even into cool energy. The potential energy recovered from all these resources decreases the energy price and keeps the environment save from pollution, diseases, etc. The potential electricity generation from the anaerobically...

Reviews

The best publication i actually study. I actually have study and so i am confident that i am going to likely to study once more yet again later on. You will not sense monotony at at any moment of your respective time (that's what catalogs are for relating to if you ask me).
