MACROPHAGES INNATE IMMUNE RESPONSES TO BACTERIAL INFECTIONS

Macrophages innate
immune responses to
bacterial infections
Transcriptional analysis: *Salmone*lla typhimurium vs
Legionella pneumophila

Kanny Diallo

LAP Lambert Academic Publishing. Paperback Condition: New. 104 pages. Dimensions: 8.7in x 5.9in x 0.2in. Macrophages are the first line of defense against microbial pathogens; they recognize microbial structures and products via surface receptors and intracellular antigen sensors. Engagement of surface receptors results in phagocytosis of the microbe into a specialized vacuole, the phagosome. Through a series of fusogenic events, the phagosome matures into a microbicidal phagolysosome that is highly acidic and contains a number of degradative enzymes and toxic molecules...
