In the past few decades, physicists have uncovered a hidden order in nature; some have called it the Cosmic Code. Based on this order, scientists aim to uncover a grand unifying Theory of Everything (TOE). Once this order is decoded, it is envisioned by some that all fields of knowledge could be linked together based upon it. Using the work of experts in various fields, this book links testable scientific evidence in the Koran with modern discoveries that lead to a normative decoding of that order. The book is unique and has the potential to evoke great interest among scientists and lay people alike because of its non-traditional linking of science and religion. The work leading to the writing of this book, and the book itself can well be described as the most important discovery of the modern era. It also presents the Koran as a falsifiable scientific theory, which years of scientific inquiry have provided testable evidence for. It is a coherent presentation of the authors life work, a collection of over 15 years of research carried out by him. The author was nominated for the prestigious Templeton Prize for Progress in Religion. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
