The sum of 3 times one number and 7 times another is equal to 58; 7 times the first number and 3 times the second is equal to 42. What are the two numbers? 17. Find two numbers, such that the first is to the second as their sum: 5, and as their difference: 3. 18. What would be the solution of the preceding question, if for 5 and 3, the general signs a and 6 were substituted? 19. A man has two vessels full, and one empty and larger than each of the other two. To fill the empty one, either the contents of the first, together with a fifth of the contents of the second, are necessary, or the contents of the second, together...
