Excerpt from Exercises in Quantitative Chemistry The essential portions of this book have been in use in the author s laboratory for several years in the form of mimeographed notes, which were revised and expanded from time to time until they became too voluminous for further duplication by this process. Hence they have been put in book form for the use of the author s students and of any others who may find them of service. The purpose which the author had in View in preparing the notes was twofold. First, to economize the energy) of the student by placing in his hands a working guide sufficiently precise to keep him in the right path during the absence of his teacher, and secondly, to increase the efficiency of the teacher by saving him waste of time and effort in repairing the grosser mistakes of inexperienced students. The book is not intended as a complete guide, even in the matters contained therein. Enough - and probably more than he can do to his satisfaction-has been left for the teacher, from whom the student may justly expect at all times the warn ing, suggestion, or amplification which will contribute most effectively to his progress and discipline.
