

Bio-Inspired, Odor-Based Navigation

Filesize: 3.47 MB

Reviews

A top quality pdf and also the font applied was fascinating to learn. it was actually writtern extremely properly and valuable. I discovered this publication from my i and dad recommended this publication to find out.

BIO-INSPIRED, ODOR-BASED NAVIGATION

To get **Bio-Inspired, Odor-Based Navigation** PDF, you should access the hyperlink beneath and download the document or get access to additional information that are related to BIO-INSPIRED, ODOR-BASED NAVIGATION ebook.

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x11 mm. This item is printed on demand - Print on Demand Neuware - The ability of many insects, especially moths, to locate either food or a member of the opposite sex, by tracking a wind-borne plume of odor molecules, is an amazing reality. Numerous scenarios exist where having this capability embedded into ground-based or aerial vehicles would be invaluable. The main crux of this thesis investigation is the development of a navigation algorithm which gives a UAV the ability to track a chemical plume to its source. Inspiration from the male moth's, in particular *Manduca sexta* (Tobacco Hornworm moth), ability to successfully track a female's pheromone plume was used in the design of both 2-D and 3-D navigation algorithms. The algorithms were developed to guide autonomous vehicles to a source generating an odor/chemical plume, using only the odor/chemical information provided by the plume. The algorithms were implemented using a variety of fuzzy controllers and ad hoc engineering approaches. The fuzzy controller, critical to the success of both algorithms, was developed to estimate the location of a vehicle relative to the plume: coming into the plume, in the plume, exiting the plume, or out of the plume. Analysis of plume detections within a short-term memory bank provided the basis for this controller. To test these algorithms, 2-D and 3-D simulation environments were developed. 188 pp. Englisch.
