By Patrick R. O'Beirne

Systems Publishing. Paperback. Condition: New. 204 pages. Dimensions: 9.1in. x 7.5in. x 0.7in. This spreadsheet book is quite different from every other book on Microsoft Excel. Each of the 47 techniques is explained with examples and has a self-test practical question with answers at the back of the book. The book's support web site provides sample spreadsheets for these tests. The material gives spreadsheet users more confidence in their work, and saves time chasing and fixing easily preventable errors. Those whose job is to check the work of others, whether they are software testers or auditors, will learn formula auditing techniques and be able to reveal hidden data and formulas. This book should be adopted by organizations concerned to reduce compliance costs by being able to demonstrate management of material risks and increase controls on spreadsheet based financial reporting.
