Dover Publications. Paperback. Book Condition: New. Paperback. 224 pages. Dimensions: 8.4in. x 5.4in. x 0.5in. Since the publication of Einsteins Special Theory of Relativity in 1905, the discovery of such astronomical phenomena as quasars, pulsars, and black holes all intimately connected to relativity has provoked a tremendous upsurge of interest in the subject. This volume, a revised version of Martin Gardners earlier *Relativity for the Million*, brings this fascinating topic up to date. Witty, perceptive, and easily accessible to the general reader, it is one of the clearest and most entertaining introductions to relativity ever written. Mr. Gardner offers lucid explanations of not only the special and general theories of relativity, but of the Michelson-Morley experiment, gravity and spacetime, Machs principle, the twin paradox, models of the universe, and other topics. A new Postscript, examining the latest developments in the field, and specially written for this edition, is also included. The clarity of the text is especially enhanced by the brilliant graphics of Anthony Ravielli, making this by far the best laymans account of this difficult subject. *Christian Science Monitor*. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
