Not illustrated. 1905 Excerpt: .connecting the temperature of a gas with its pressure, density, and index of refraction, proved to hold throughout a considerable range and assumed to hold for higher temperatures, it can be shown that the temperature of the gas in the hot tube is denned in terms of the equivalent lengths of the two tubes and the temperature and pressure of the gas in the cold tube. This method is evidently an independent system of gas thermometry, and while not in the strict sense of the word a method of optical pyrometry, it may eventually be of service in the extension of the gas scale to higher temperatures than can be obtained by the ordinary forms of gas thermometer, and so serve as an independent check on the radiation laws at these high temperatures. 4.
