TOPICS IN THE THEORY OF LIFTING

To get **Topics in the Theory of Lifting** eBook, make sure you follow the hyperlink beneath and download the document or get access to other information that are in conjunction with TOPICS IN THE THEORY OF LIFTING ebook.

Springer Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 229x152x11 mm. This item is printed on demand - Print on Demand Neuware - The problem as to whether or not there exists a lifting of the $M^t/.$ 1 space) corresponding to the real line and Lebesgue measure on it was first raised by A. Haar. It was solved in a paper published in 1931 [102] by 1. von Neumann, who established the existence of a lifting in this case. In subsequent papers J. von Neumann and M. H. Stone [105], and later on 1. Dieudonne [22], discussed various algebraic aspects and generalizations of the problem. Attempts to solve the problem as to whether or not there exists a lifting for an arbitrary $M^t/.$ space were unsuccessful for a long time, although the problem had significant connections with other branches of mathematics. Finally, in a paper published in 1958 [88], D. Maharam established, by a delicate argument, that a lifting of $M^t/.$ always exists (for an arbitrary space of a-finite mass). D. Maharam proved first the existence of a lifting of the $M^t/.$ space corresponding to a product $X = \prod_{i \in I} X_i$ and a product measure $\mu = \prod_{i \in I} \mu_i$ with $\mu_i = \mu_i$ for all $i \in I$. Then, she reduced the general case to this one, via an isomorphism theorem concerning homogeneous measure algebras [87], [88]. A different and more direct proof of the existence of a lifting was subsequently given by the authors in [65]. A variant of this proof is presented in chapter 4. 192 pp. English.
