

Mild Traumatic Brain Injury and Postconcussion Syndrome: The New Evidence Base for Diagnosis and Treatment

By Michael A. McCrea

Oxford University Press, USA. Paperback. Condition: New. 224 pages. Dimensions: 9.1in. x 6.1in. x 0.5in. This is the first neuropsychology book to translate exciting findings from the recent explosion of research on sport-related concussion to the broader context of mild traumatic brain injury (MTBI) and post-concussive syndrome (PCS) in the general population. In addition, it includes a Continuing Education (CE) component administered by the American Academy of Clinical Neuropsychology. Traumatic brain injuries constitute a major global public health problem, but until now, MTBIs, which constitute up to 90 percent of all treated TBIs, have been difficult to evaluate and manage clinically because of the absence of a viable model. Dr. McCrea's book thus provides a welcome evidence base for all clinicians - including psychologists, neuropsychologists, neurologists, neurosurgeons, rehabilitation medicine physicians, physiatrists, and nurses - involved in the clinical diagnosis and treatment of MTBI, as well as attorneys involved in personal injury litigation and personal injury defense. Each section of the book ends with a helpful summary of the Top 10 Conclusions. Instructions for earning AACN-administered CE credit are included. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.

Reviews

Very helpful to all of group of people. It is one of the most incredible pdf i have study. I am very easily could possibly get a satisfaction of studying a published ebook.

-- **Gust Kuphal**

This ebook is definitely not easy to get going on looking at but quite fun to learn. We have read and so i am sure that i will gonna study once more yet again later on. I am very happy to inform you that here is the finest publication i actually have read inside my personal daily life and might be he best publication for possibly.
