

Introduction to the Modelling of Marine Ecosystems (Hardback)

By W Fennel, T Neumann

ELSEVIER SCIENCE TECHNOLOGY, United Kingdom, 2014. Hardback. Book Condition: New. 2nd Revised edition. 240 x 160 mm. Language: English . Brand New Book. Introduction to the Modelling of Marine Ecosystems, Second Edition provides foundational information on the construction of chemical and biological models - from simple cases to more complex biogeochemical models and life cycle resolving model components. This step-by-step approach to increasing the complexity of the models allows readers to explore the theoretical framework and become familiar with the models even when they have limited experience in mathematical modeling. Introduction to the Modelling of Marine Ecosystems shows how biological model components can be integrated into three dimensional circulation models and how such models can be used for numerical experiments. * Covers the marine food web from nutrients, phytoplankton to higher trophic levels* Presents information on the response of marine systems to external pressures as seen in physical biological models* Provides an extended discussion of unifying theoretical concepts and of physical biological interaction* Covers higher trophic levels, in particular multi-species fish models and their interaction with the biogeochemical models* Offers MATLAB scripts on a companion website for many of the described example models to facilitate reproduction of the findings in...

Reviews

If you need to adding benefit, a must buy book. it absolutely was writtern extremely flawlessly and valuable. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Mrs. Odie Murphy II**

Good e-book and beneficial one. it absolutely was writtern quite flawlessly and beneficial. I am delighted to explain how this is basically the very best ebook i have read through within my very own daily life and may be he greatest ebook for at any time.
