John Wiley Sons Inc, United States, 2013. Hardback. Condition: New. 1. Auflage. Language: English . Brand New Book. The dramatic and well chronicled crisis of 2007/8 marked a watershed moment for all stakeholders in global capital markets. In the aftermath, financial markets have become even more tightly coupled as correlations in returns across multiple asset classes have been at historically elevated levels. Investors and fund managers are, to a much larger degree than previously and often much more than they realize, subject to the risk of severe wealth destruction. The ultimate hazard, which is not adequately characterized by the widely touted notion of tail risk, is the systemic risk which arises when liquidity in markets completely evaporates. Not only did this happen in the second half of 2008, but it has been repeated episodically since then most notably in May 2010, in an incident known as the Flash Crash, and in the fall of 2011 when correlations were at historically elevated levels. Conventional asset allocation tools and techniques have failed to keep apace with the changing financial landscape which has emerged since 2008. In addition to the preponderance of algorithmic trading and the associated changes in the liquidity characteristics of financial markets, a new paradigm of risk on/risk off asset allocation has emerged. Risk on/risk off is a widely adopted style of trading and macro allocation strategy where positions are taken in several closely aligned asset classes depending on the prevailing sentiment or appetite for risk. The consequences of the day to day (and intraday) switching between either a risk on or risk off tactical strategies poses significant new challenges to investors who are still making investment decisions with outmoded notions from traditional asset allocation theory. How can one cushion the impact of systemically threatening events when the ability to...
