This item is printed on demand - Print on Demand Neuware - Bachelor Thesis from the year 2013 in the subject Economics - Finance, grade: 1.00, University of Vienna (Institute for Business Administration; Chair of Finance), course: International Financial Management, language: English, comment: Rarely an incident echoed this vastly in economic-books, reports, articles and also theses. The Financial Crisis of 2008 has been broadcasted, propagated and also radiated like fear. As media itself has not the actual goal of being scientific, a lot of information has been compromised by entities, which have the incentive to manipulate. , abstract: Summa summarum the Financial Crisis was like a test of faith, namely this is what remains when the complex and complicated formulas of finance are decoded. The acceleration of different methods like the housing policy creation has to be taken into account due to the fact that the space for growth is still accessible however if peaks tend to point to the limitations of the system a possible crash is immanent. The big question is when and how finiteness will be reached. 32 pp. Englisch.
