## IMPLEMENTATION OF A GREEN BUS- POWERED BY SOLAR, WIND & FOOT PRESSURE

To get **Implementation of a Green Bus- Powered by Solar, Wind & Foot Pressure** eBook, you should follow the web link below and save the document or have accessibility to additional information that are relevant to IMPLEMENTATION OF A GREEN BUS- POWERED BY SOLAR, WIND & FOOT PRESSURE ebook.

LAP Lambert Academic Publishing Dez 2017, 2017. Taschenbuch. Condition: Neu. Neuware - In this modern era, people have become such dependent on motorized transportation that they want to have their private mode of transport for the convenience of their frequent movement. From a recent statistics it is found that currently almost 2.7 million vehicles are running alone on the roads of Bangladesh and approximately 2.4 million are the type of vehicle which is used for personal means. Because of the huge number of vehicles on the road, the fuel consumption is very high and except gas, most of other fuels (octane, petrol, diesel etc.) are imported from abroad. Bangladesh an import-dependent country, with this high demand of fuel, is so now counting loss. Furthermore burning of these fuels causes a huge amount of carbon dioxide (CO<sub>2</sub>) emission that results greenhouse effect. In this project, the idea of a green bus system is proposed which can be a remarkable aid to the recent traffic condition. In this regard a prototype of green bus system is implemented where resources such as wind, solar and piezo-electric generator are employed. All the resources being used in this project are abundantly available and also emit zero CO<sub>2</sub>. 84 pp. Englisch.
