Foreword Web services have attracted much attention recently as the next 'big thing' in computing technology. Vendors of all shapes and sizes have announced their support for Web services technologies, and every month a new Web services conference is popping up somewhere on the globe. With all this hype and attention, sometimes it's difficult to really discover what Web services are, where they fit in your company, what the business case is, and how you can actually get started taking advantage of this technology. BEA has been working with customers to answer many of these questions, and provide solutions that enable companies to easily construct Web services that meet their needs today. 450 pp. Deutsch.
