

Cardiac Resynchronization Therapy for Congestive Heart Failure: Evidence Report/Technology Assessment Number 106 (Paperback)

Filesize: 4.37 MB

Reviews

These sorts of book is the perfect book accessible. It is amongst the most amazing book i have got read. I found out this ebook from my i and dad advised this book to find out.

CARDIAC RESYNCHRONIZATION THERAPY FOR CONGESTIVE HEART FAILURE: EVIDENCE REPORT/TECHNOLOGY ASSESSMENT NUMBER 106 (PAPERBACK)

To save **Cardiac Resynchronization Therapy for Congestive Heart Failure: Evidence Report/Technology Assessment Number 106 (Paperback)** PDF, you should refer to the hyperlink beneath and download the document or get access to additional information that are relevant to CARDIAC RESYNCHRONIZATION THERAPY FOR CONGESTIVE HEART FAILURE: EVIDENCE REPORT/TECHNOLOGY ASSESSMENT NUMBER 106 (PAPERBACK) ebook.

Createspace Independent Publishing Platform, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Heart failure is the fastest growing cardiovascular diagnosis in North America, and it carries a poor prognosis. To improve survival in heart failure patients, therapies need to reduce either sudden cardiac death (the most common cause of death in patients with New York Heart Association [NYHA] Class I or II symptoms) or progressive heart failure (the predominant cause of death in those with NYHA Class III or IV symptoms). Electrical conduction disturbances are common in heart failure and are associated with increased mortality risk. Atrial-synchronized biventricular pacing (cardiac resynchronization therapy [CRT]) addresses many of the pathophysiological changes seen in patients with wide QRS complexes in whom delayed activation of the left free wall results in mechanical dyssynchrony. The University of Alberta Evidence-based Practice Center conducted a systematic review to examine the success rate and safety of biventricular pacemaker implantation and the efficacy of CRT in patients with heart failure. Further, the researchers used these data in a decision analysis to evaluate the incremental cost effectiveness of CRT versus medical therapy alone. This report addresses the following questions: 1. In adult patients with symptomatic heart failure, is CRT more effective than optimal medical care alone? 2. Is the implantation of a CRT system safe for patients? 3. What is the role of CRT in the treatment of heart failure? 4. What is the cost-effectiveness of CRT in patients with congestive heart failure?.
