

Internet of Things (IOT) for Smart Connected Digital Life and Emerging Cloud Services (Wiley - Ieee)

Filesize: 2.09 MB

Reviews

This publication is indeed gripping and intriguing. It is actually written in basic terms and not difficult to understand. I am just pleased to explain how here is the greatest publication we have read through during my own lifestyle and could be the best pdf for at any time.

INTERNET OF THINGS (IOT) FOR SMART CONNECTED DIGITAL LIFE AND EMERGING CLOUD SERVICES (WILEY - IEEE)

To read **Internet of Things (IOT) for Smart Connected Digital Life and Emerging Cloud Services (Wiley - IEEE)** eBook, make sure you follow the hyperlink listed below and save the document or gain access to other information that are highly relevant to INTERNET OF THINGS (IOT) FOR SMART CONNECTED DIGITAL LIFE AND EMERGING CLOUD SERVICES (WILEY - IEEE) ebook.

Wiley. Hardcover. Condition: New. 280 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. The trend toward increasing computer and network capabilities into an expanding number of devices and device types in our networks are creating an Internet of Things (IoT). Consequently, this technology trend is driving the need to create Smart Network Gateways capable of unifying connectivity amongst these devices serving each premise with high-performance networking such as Ethernet LAN, 3G/4G broadband, 802.11 compliant Access-Points (APs), WLANs, G.hn, 802.15.4 ZigBee wireless sensor networks (WSNs), and wired and wireless machine-to-machine (m2m) solutions. These new distributed processing and networked devices will provide sensing, data acquisition, adaptive real-time decision making, data distribution access, machine vision with real-time video analytics, and over time, an adaptable learning ability, each with an intent to help make our world safer, greener, and more secure. The impact is huge in terms of explosive growth of internet traffic, increase of broadband speed and the emergence of multimedia class of applications. This has led to the migration from client-server to cloud computing and services. Security has become and remains to be a key challenge to secure access of content at anytime and anywhere. The introduction of smart phones has generated a wide acceptance and adoption by business, consumer and general population. Today, we see high growth in mobile traffic than landline. Increase longer life battery, introduction of tablets and growth of ecosystem for mobile applications will cause a gradual decline in the growth of PCs and rapid end of life of desktop equipment. The amount of data being created and transmitted over networks from mobile devices and IoT will continue to grow in an explosive way. This, in turn, will impact businesses by entering in a new era of computing that requires systems to process and analyze,...
