Summary: ASQ: SE(TM) components include- 8 questionnaires and corresponding scoring sheets. Parents complete the short, simple questionnaires at all or some of the 8 age intervals. Set up like ASQ(TM), these questionnaires--available in English or Spanish--prompt parents to answer 22-36 questions with most of the time, sometimes, and rarely or never. Each questionnaire takes 10-15 minutes for parents to complete and addresses the seven behavioral areas listed above. For every questionnaire, there's also a photocopiable form that allows professionals to score the test in minutes and determine the child's progress in that area.- The ASQ: SE(TM) User's Guide. Clear and comprehensive, the User's Guide walks professionals step-by-step through the process of implementing ASQ: SE(TM). It provides detailed technical data; instructions on administering the questionnaires with sensitivity to children's environmental, cultural, and developmental differences; helpful case examples; and creative activities and lists of social-emotional behaviors professionals can share with parents for use with each age group. Spanish translations of letters to parents and selected forms are also included.
