

Proceedings of the International Symposium: Nuclear Physics and Gamma-Ray Sources for Nuclear Security and Nonproliferation

By -

World Scientific Publishing Co Pte Ltd. Hardback. Condition: new. BRAND NEW, Proceedings of the International Symposium: Nuclear Physics and Gamma-Ray Sources for Nuclear Security and Nonproliferation, Nuclear nonproliferation is a critical global issue. A key technological challenge to ensuring nuclear nonproliferation and security is the detection of long-lived radioisotopes and fissionable nuclides in a non-destructive manner. This technological challenge requires new methods for detecting relevant nuclides and the development of new quantum-beam sources. For example, one new method that has been proposed and studied is nuclear resonance fluorescence with energy-tunable, monochromatic gamma-rays generated by Compton scattering of laser photons with electrons. The development of new methods requires the help of researchers from a wide range of fields, such as nuclear physics, accelerator physics, laser physics, etc. Furthermore, any new method must be compatible with the requirements of administrators and nuclear-material inspectors.

Reviews

This publication is worth getting. it absolutely was writtern very completely and useful. I am quickly could possibly get a pleasure of reading a written publication.

-- **Ariane Rau**

The book is fantastic and great. It generally does not expense excessive. Its been designed in an exceptionally easy way and it is simply right after i finished reading through this book by which really changed me, change the way i think.

-- **Adolfo Lindgren**
