Reviews

It is just one of my personal favorite publications. It is among the most awesome publications I have read. It is extremely difficult to leave it before concluding, once you begin to read the book.

WHEN RELIGIOUS FAITH COLLIDES WITH SCIENCE (PAPERBACK)

Resource Publications (CA), 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****A 2014 Gallup Poll indicated that 26 percent of Americans believe that humans came into existence less than 10,000 years ago, with a much larger 37 percent believing the world was created in six 24-hour days. Those percentages represent around 83 million and 118 million people respectively, suggesting these to be ideas that resonate with a large swath of the population. Given the prevalence of such thinking the question looms, Is it possible that so many people could be wrong, or is science simply mistaken about some of these matters? This book is very much about the importance process plays in the conclusions that are reachable, with Jan Long proposing that process itself can answer such questions, doing so in a way that offers credibility. He proposes that process entails a set of well-established rules for how knowledge is acquired, and these can help guide the formation of a sacred construct about beginnings. In the final analysis it is a process that seeks to replace dogmatic thinking with humble and tentative expressions about that which is knowable about the many mysteries of reality that convey to sentient beings, awe and wonder. Written with devotion to details and comprehension to rational evidence, When Religious Faith Collides with Science creates a framework for answering important questions for the evangelical mind. The truth is, when you are no longer making up your mind on a purely scientific or religious basis it becomes a matter of life, and how an individual wishes to live. This book is a guidebook to that adventure. --T. Joe Willey, Retired Professor of Neuroscience, the School of Medicine, Loma Linda University; former conductor of neuroscience research, The Brain Research Institute, UCLA [Long]...
