# RUN-TIME RECONFIGURABLE CONSTANT MULTIPLICATION ON FIELD PROGRAMMABLE GATE ARRAYS

Kassel University Press Okt 2017, 2017. Taschenbuch. Condition: Neu. Neuware - This book addresses the question how run-time reconfigurable constant multipliers (RCMs) can be efficiently implemented on field programmable gate arrays (FPGAs). RCMs calculate the multiplication of an input number by one out of several constants which can be selected during run-time. This is important as constant multiplication is an essential operation in digital signalprocessing (DSP) applications. The evaluation of RCMs is done by considering reconfiguration using reconfigurable look-up tables...

## Reviews

*It is one of the most popular publications. We have read through and that I am sure that I will likely study again once more later on. I am just delighted to tell you that this is actually the finest publication we have read through in my individual existence and might be the best PDF for actually.*

-- **Mr. Cloyd Schmidt II**

*It is fantastic and great. This is for those who state there was not a worth looking at. It has been written in an exceptionally easy way which is only soon after I finished reading this eBook through which in fact changed me, change the way I really believe.*

-- **Barry O'Reilly**
