Condition: New. Publisher/Verlag: Springer, Berlin | 12th Conference on Artificial Intelligence in Medicine in Europe, AIME 2009, Verona, Italy, July 18-22, 2009, Proceedings | The European Society for Artificial Intelligence in Medicine (AIME) was established in 1986 following a very successful workshop held in Pavia, Italy, the year before. The principal aims of AIME are to foster fundamental and applied research in the application of artificial intelligence (AI) techniques to medical care and medical research, and to provide a forum at biennial conferences for discussing any progress made. For this reason the main activity of the society was the organization of a series of biennial conferences, held in Marseilles, France (1987), London, UK (1989), Maastricht, The Netherlands (1991), Munich, Germany (1993), Pavia, Italy (1995), Grenoble, France (1997), Aalborg, Denmark (1999), Cascais, Portugal (2001), Protaras, Cyprus (2003), Aberdeen, UK (2005), and Amsterdam, The Netherlands (2007). This volume contains the proceedings of AIME 2009, the 12th Conference on Artificial Intelligence in Medicine, held in Verona, Italy, July 18-22, 2009. The AIME 2009 goals were to present and consolidate the international state of the art of AI in biomedical research from the perspectives of theory, methodology, and application. The conference included two invited lectures, full and short papers, tutorials, workshops, and a doctoral consortium. In the conference announcement, authors were solicited to submit original contributions regarding the development of theory, techniques, and applications of AI in biomedicine, including the exploitation of AI approaches to molecular medicine and biomedical informatics and to healthcare organizational aspects. Authors of papers addressing theory were requested to describe the properties of novel AI methodologies potentially useful for solving biomedical problems. | Invited Talks.- Discovering Novel Adverse Drug Events Using Natural Language Processing and Mining of the Electronic Health Record.- Computer Vision: A Plea for a Constructivist View.- Temporal Reasoning and Temporal Data Mining.- Mining Healthcare Data with Temporal Association Rules: Improvements and Assessment for a Practical Use.- A Temporal Data Mining Approach for Discovering Knowledge on the Changes of the Patient's...
