

## The Journal of Experimental Zoology, Vol. 16 (Classic Reprint) (Paperback)

Filesize: 3.45 MB

### **Reviews**

*It is in a single of the most popular ebook. It really is simplified but excitement in the fifty percent from the pdf. It is extremely difficult to leave it before concluding, once you begin to read the book.*  
*(Joy Langosh)*

**THE JOURNAL OF EXPERIMENTAL ZOOLOGY, VOL. 16 (CLASSIC REPRINT) (PAPERBACK)**

Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from The Journal of Experimental Zoology, Vol. 16 While studying the phenomena of regeneration and structural regulation in Bursaria, it became desirable to know something of the relations of this organism to its food and of the processes which the solid food material undergoes in its passage into and through the cell and in the elimination of residues. This paper aims to present the first part of these observations and to make a general survey of the relations of this organism to food, leading up to a more detailed study of these and certain other problems of the cell as found in this unicellular animal. Bursaria was found to be much more favorable for the investigation of these phenomena than the smaller infusoria such as Paramecium. No study has heretofore been made of the relations of Bursaria to food, so that the facts herein presented are new. The present investigation attempts not only to determine qualitatively whether the relations to food are similar to those more or less known for Paramecium, Stentor, Vorticella and other infusoria, but more particularly to work out and express these relations in a more quantitative way than has been done heretofore. It was found that certain kinds of experimental tests such as those on the rate of digestion, could be made upon this form, which it would have been difficult or impossible to carry out on smaller unicellular organisms. Its very large size offers a singular opportunity for easy manipulation in many kinds of work. When in a clear medium it is readily visible to the naked eye at a distance of six or eight feet and individuals may be transferred singly with a pipette...
