The stress on the boss is much more evenly distributed than with the older single-taper bushings. The ends of the shaft are, of course, turned, to form the journals and to receive the collars and cam-shaft pulleys. The ordinary Blanton taper-bushing is shown for the attachment of the pulley. In the earlier types of aim-shafts, two key-seats were cut along almost the whole length of the shaft, and the positions of the cam on the shaft s circumference were fixed by so disposing the key-ways in the hub of the cam as to give the proper circumferential distribution. This type of cam-shaft has, however, become a thing of the past. It presents such practical difficulties in working as the following: --(1) The vibration of the mill renders it almost impossible to keep the keys tight, and hence the...
